

Cisco Software Licensing Information for Cisco Unified Communications 500 Series for Small Business

Feb. 06, 2008, OL-15900-01

This document describes the Cisco Software Licensing (CSL) information for the Cisco Unified Communications 500 Series for Small Business (Cisco Unified 500 Series) and the procedures for installing licenses using Cisco Configuration Assistant 1.5 (CCA 1.5).

Contents

System Requirements

This software version is supported on the following Cisco Unified 500 Series models:

- UC520-8U-4FXO-K9
- UC520W-8U-4FXO-K9
- UC520-8U-2BRI-K9
- UC520W-8U-2BRI-K9
- UC520-16U-4FXO-K9
- UC520W-16U-4FXO-K9

Americas Headquarters:
Cisco Systems, Inc., 170 West Tasman Drive, San Jose, CA 95134-1706 USA

- UC520-16U-2BRI-K9
- UC520W-16U-2BRI-K9
- UC520-24U-8FXO-K9
- UC520-24U-4BRI-K9
- UC520-32U-8FXO-K9
- UC520-32U-4BRI-K9
- UC520-48U-12FXO-K9
- UC520-48U-6BRI-K9

Cisco Software Licensing

The Cisco UC500 Series platforms support CSL so that the platforms can be upgraded or downgraded in the field. A system with 8 users can be upgraded to a 16-user license. A system with 32 users can be upgraded to a 48-user license. The number of users can also be downgraded.

IP phones are registered, based on the availability of a license for each phone. The system reloads when a system license is downgraded due to license expiration or by configuration by the user, and when the number of registered phones exceeds the user license count.

The following software licensing features have been implemented:

- The software supports evaluation, extension, permanent, and grace-period licenses.
- The licensing infrastructure manages the installation and expiration events.
- To see license information, use the **show license**, **show platform software license**, and **show version** Cisco IOS Command Line Interface (CLI) commands.
- To upgrade the UC 500 systems, use the **license feature uc500-16u-upgrade** and **license feature uc500-48u-upgrade** Cisco IOS CLI commands. To downgrade the licensed configuration, use the **no** versions of these commands.
- To install extension licenses and permanent licenses, use the **license install flash:***<license_filename>* Cisco IOS CLI command.

Obtaining a License

Follow these steps to obtain a license:

-
- Step 1** Purchase a PAK for the desired type of license.
- PAKs are purchasable items, ordered in the same manner as other Cisco equipment. PAKs are used to obtain license files for feature sets on specific classes of Cisco devices.
- Step 2** From the License Management window of CCA, get the device ID number (UDI) for your router.
- Step 3** To convert the PAK to a license, submit the PAK code and UDI of the router to Cisco's online license portal:
<http://www.cisco.com/go/license>.
 After entering the appropriate information at the above URL, you will receive an email containing the license information which you can use to install the license.

- Step 4** Using CCA, follow the procedures given in this document to upgrade the license you have obtained depending on your license type.
-

License Type Descriptions

This section describes the types of licenses that Cisco Configuration Assistant 1.5 supports.

Evaluation License

Evaluation licenses are non-node-locked, metered licenses that are bundled with the Cisco IOS image and valid for a limited period of time. Use this license only when there is no permanent, extension, or grace-period license for a feature. You must accept the End User License Agreement (EULA) before using this license.

Extension License

Extension licenses are node-locked metered licenses that are issued through the Cisco licensing portal. You must accept the EULA as part of the installation of this license.

Permanent License

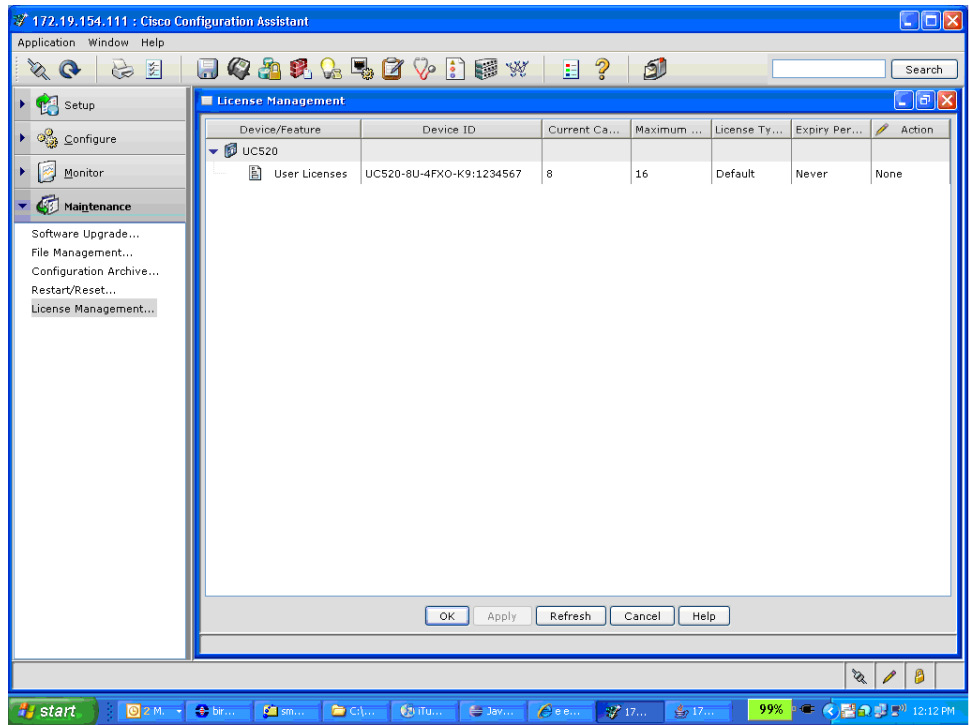

Permanent licenses are node-locked licenses with no associated usage period. These licenses are issued through the Cisco licensing portal. You must accept the EULA as part of the installation of this license.

Installing an Evaluation License

To install a new evaluation license or to increase or decrease the number of licenses, follow these steps:

-
- Step 1** In CCA 1.5, click **License Management** from the **Maintenance** tab in the left navigation pane.
- Step 2** In the **License Management** window, click on **Device/Feature** as shown in [Figure 1](#). To obtain an evaluation license, choose **Evaluation** from the **Action** drop-down menu.

242100

- Step 3** In the EULA window, click **Yes**. The status pane at the bottom changes to show that your license is being upgraded, as shown in [Figure 2](#).

Figure 2 *Evaluation License Upgrade in Progress*

242101

- Step 4** When complete, the related fields are automatically updated to show the number and type of license you have requested, as shown in [Figure 3](#). Click **OK**.

Installing an Extension or a Permanent License

To install an extension or a permanent license, follow these steps:

- Step 1** In CCA 1.5, from the **Maintenance** tab in the left navigation pane, click **License Management**.
- Step 2** In the License Management window, click on **Device/Feature** as shown in [Figure 1 on page 4](#).

- Step 3** From the **Action** drop-down menu, choose **Select License**. An **Upload Prompt File** window appears, in which you can browse to the list of license files as shown in [Figure 4](#).

Figure 4 Upload Prompt File Window

- Step 4** Double-click the name of the license file that you want to upload.

- Step 5** In the EULA window, click **Yes**. The status pane at the bottom changes to show that your license is being upgraded, as shown in [Figure 5](#).

Figure 5 License Upgrade in Progress Window

- Step 6** When complete, the related fields are automatically updated to show the number and type of license you have requested. Click **OK**.

Canceling a License

To cancel a license upgrade, click **Cancel** before you click **Apply** or **OK**. The installation is canceled, and the original license status appears. When the licenses are successfully installed, the capabilities of each licensed feature appears in the Capabilities column.

Note

Every time you connect to or refresh the network, CCA notifies you of the status of a temporary license by using the **Notification** window. You are also notified when the license for any feature is expiring within 10 days or less, and the system will recommend that you install a permanent license.
