

Cisco Safe Harbor Content Switching Module (CSM) IOS Release 3.2.3/12.1(23)E for Financial Enterprise Customers

Version History

Version Number	Date	Notes
1	October 29, 2004	This document was created.
2	March 23, 2005	Updated title and URL reference.

Cisco Safe Harbor is an initiative, the goal of which is customer success through improved quality. Safe Harbor delivers Catalyst 6500 switch customers with a certified Cisco OS version of choice for critical deployment. Safe Harbor certified code has shortened customer deployment times while increasing their overall network stability.

Safe Harbor subjects targeted releases (deployed in topologies consistent with those of identified customers) to complex levels of testing. The program offers additional benefit by serving as the conduit through which customer information can influence Cisco premier testing.

The Cisco nEverest program is a similar initiative that leverages Safe Harbor test results and expands its concept into other vertical market platforms.

Cisco Safe Harbor Content Switching Module (CSM) IOS Release 3.2.3/12.1(23)E for Financial Enterprise Customers provides a summary of the system-level and reliability testing completed for the specified release. If you would like to see the contents of this document and you are a Cisco customer, it is available at the following URL:

<http://www.cisco.com/systemtest/CSM323/CSM323.pdf>

If you are a Cisco employee and would like to see supplementary information related to this testing, please go to the documentation page of the nEverest website and select the appropriate Safe Harbor release under the Enterprise Financial profile. The nEverest website can be found in CEC by searching on the term “nEverest.”
